Summary

With 20 years of deadline-driven experience as an Installation Service Engineer for Varian Medical Systems, my abilities to work independently and maintain high levels of productivity is one of many of my strong points. Prior to working for Varian and Nucletron, I proudly served in the U.S. Navy for 10 years as an Electronic Technician and Instructor with Top Secret Clearance. Before entering the Navy I enjoyed my career as Construction Manager for a renowned contractor. This included broad yet proficient expert knowledge ranging from structural, electrical, mechanical, plumbing and intricate blueprints. The starting point of my working experience was as a certified welder for Texaco Oil. These careers have produced a broad spectrum of well balanced skills, and rounded expertise ranging from supervision, trouble shooting and problem solving. I am proficient from the ground level of nuts and bolts to complete construction with expanded experience in installation and service on Radiation Therapy Simulators and Clinical Linear Accelerators.

Skills

Experience

Installation Service Engineer / Field Service Engineer / Customer Service and Support	06/1998 to Current
Varian Medical Systems	Marietta, Ga

Proficient job performance specializing in Clinical Linear Accelerators, Radio Therapy Simulators, Brachy Therapy High Dose Rate Units, Peripheral Options and Imaging Systems: installation, service, upgrades, calibration, alignment, mechanical hydraulic and pneumatic troubleshooting with verification equipment such as Oscilloscopes, digital volt meter's, micrometers, dial indicators and closed water scanners. Knowledge and professional technical experience with PC based systems. When an installation or upgrade is completed, I consistently receive my satisfaction survey from the physicists complementing my tight specifications of all aspects of the equipment. Upon a new purchase, numerous customers specifically request me to return as their installer! Tasked with training new hires. My Vendor Credentialing requirements are all up to date.

?

Installation Engineer	08/1995 to 06/1998
Nucletron	Columbia, Maryland

Installed Radio Therapy Simulators and Brachy Therapy High Dose Rate Units. Same responsibilities as above with Varian Medical Systems.

Electronic Warfare Technician	10/1985 to 08/1995
U.S. Navy	Mayport, FL

Operated, maintained and repaired passive and active radar systems, counter measure systems. SLQ-32, WLHR 1 Hotel, NIXIE and Chaff Counter measures. I took much pride in my position as an Instructor at a top secret facility for Cryptologic Technicians in ACDC Theory, Power Supplies and Amplifiers. As collateral duty I was qualified for base security with self defense driving, personal self defense and weapons training to include CPR certification. I was deployed onto the USS Forrestal Aircraft Carrier for 3 years in which we were a key component with high activity in the Persian Gulf War. Next, I was assigned to the USS Jack Williams as a member of the "Snoopy Team" and worked side by side with a Marine detachment performing drug seizures and searching ships in route from South America. While stationed on the Aircraft Carrier the USS John F. Kennedy I received a promotion as Lead Petty Officer in charge of a division of 18 Electronic Warfare Technicians. I received numerous letters of commendations from the ship's

commanding officer for my outstanding crew Training, scheduling, discipline actions and moral.

Construction Manager

01/1978 to 09/1995

Ried Construction

Panama City Beach, FL

To date, building and any sort of construction is my passion, talent and my favorite past time! At the age of 10 years old I spent every free minute working in my Uncles cabinet shop. By the age of 14 I could build any custom cabinet or door no matter how difficult! My talent and ability to envision the final product, and how to build it, just comes natural. As Construction Manager, among many of my responsibilities was; All construction aspects were laid out and built to the blue-print specifications, hiring sub-contractors, verify framing, footers, electrical, plumbing and mechanical. Calculating estimates and ordering materials were to be accurate on a daily basis. I managed several crews on different job sites which ranged from Convenience Stores, Single Family Housing, Strip Malls and Multi-Unit Condo's. Permits and walk through's with building inspectors were a strong point that supports my "do it right the first time" attitude, resulting in all my projects passing code. I was told by several inspector's "job well done, you went well above and beyond code".
